

Polystyrene skirting technical specifications

GENERAL CHARACTERISTICS

CHARACTERISTICS	SYMBOL	SPECIFICATIONS
Type of product		Skirting board, composition based on polystyrene
Moisture resistant		100% waterproof, after 48 hours in contact with water it remains unchanged.
Insect prevention		100 %
Thickness of the element		12 / 15 mm
Length		2250 mm
Width		80 / 100 mm
Brightness (angle 60)		30-35 gloss
Colour		White
Flatness		concave-convex 0.5mm
Liquid stain resistance (10 min. application)		Tea: no stains Coffee: no stains Commercial vinegar: No stains
Coating bonding resistance		The adhered masking tape resists tearing without superficial deterioration (temperature range between 5° C and 30° C).

To cut the skirting boards use a hand or power saw with a fine-tooth blade. If a mechanical tool is used, you must avoid heating of the disc, which can affect the final appearance.

Before using products that contain solvents, alcohol or acetone, test on non-visible areas as it can cause deterioration and loss of surface gloss.
